- Proposed Reservoir Pool

This map was created to be used for guidance purposes only. It shows general locations and boundaries; precise location of features shown hereon will be determined by the County. Map features shown hereon are subject to change.

This map is to be used in conjunction with the Water Resource Management Manual as adopted in §Chapter 218-5 of the Code of Public Local Laws and Ordinances of Carroll County.

Actual stream locations are site specific and may extend beyond the limits shown on this map. A detailed site investigation should be performed to determine actual extents of streams, stream buffers and Surface Water Management Zones.

Countywide Stream Buffers are variable in width, thus the Stream Buffers shown on this map are for guidance purposes and may not represent the actual width of the required buffer.

The data layers represented on this map are prepared by Carroll County for internal use and is made available because it is public information. Carroll County, its agencies or employees, do not warrant its accuracy.

Prepared by Carroll County Bureau of Resource Management (MR).
